# 1. SAFETY INSTRUCTIONS

## 1.1. General Safety Warnings

- Read these instructions carefully before using your appliance and keep this manual for future reference.

 Please check the packaging of your machine before installation and the outer surface of the machine once the packaging has been removed. Do not operate the machine if it appears damaged or if the packaging has been opened.

- Packaging materials protect your machine from any damage that might occur during transportation. The packaging materials are environmentally friendly as they are recyclable. Use of recycled material reduces raw material consumption and decreases waste production.

 This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

 Children should be supervised to ensure that they do not play with the appliance. Remove packaging and keep it out of reach of children.

 Keep children away from detergents and rinse aids.

 There may be some residue left in the machine after washing. Keep children away from the machine when it is open.

## 1.2. Installation Warnings

- Choose a suitable and safe place to install your machine.
- Only original spare parts should be used with the machine.

 Unplug the machine before installation.

 Your machine must only be installed by an authorised service agent. Installation by anyone other than an authorised agent may cause your warranty to be void.

 Check that the indoor electrical fuse system is connected in line with safety regulations.

 All electrical connections must match the values on the plate.

 Ensure the machine does not stand on the electrical supply cable.

 Never use an extension cord or a multiple socket connection.

 The plug should be accessible after the machine is installed.

- After installation, run your machine unloaded for the first time.

 The machine must not be plugged in during positioning.

 Always use the coated plug supplied with your machine.

 If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

## 1.3. During Usege

- This machine is for domestic use only; do not use

- it for other purposes. Commercial use will void the guarantee.

 Do not stand, sit or place loads on the open door of the dishwasher.

 Only use detergents and rinse aids produced specifically for dishwashers. Our company is not responsible for any damage that may occur due to misuse.

 Do not drink water from the machine.

 Due to the danger of explosion, do not place any chemical dissolving agents into the machine's washing section.

- Check the heat-resistance of plastic items before washing them in the machine.

 Only put items in the machine which are suitable for dishwashing, and take care not to overfill the baskets.

 Do not open the door while the machine is in operation, hot water may spill out. Safety devices ensure the machine stops if the door is opened.

 Do not leave the dishwasher door in the open position, it can cause a tripping hazard.

 Place knives and other sharp objects in the cutlery basket in a blade-down position.

 For models with the automatic door-opening system, when the EnergySave option is active, the door will open at the end of a program. To prevent damage to your dishwasher, do not attempt to close the door for one minute after it has opened. For effective drying, keep the door open for 30 minutes after a programme has ended. Do not stand in front of the door after the auto-open signal sounds.

 In the case of a malfunction, repair should only

be performed by an authorised service company, otherwise the warranty will be void.

 Before repair work, the machine should be disconnected from the mains. Do not pull the cable to unplug the machine. Switch off the water tap.

 Operation at a low voltage will cause a decline in performance levels.

 For safety, disconnect the plug once a program has finished.

 To avoid an electric shock, do not unplug the machine with wet hands.

 Pull the plug to disconnect the machine from the mains, never pull on the cord.

 Any openings in the base must not be obstructed by carpet.

## **RECYCLING**

- Some machine components and packaging consist of recyclable materials.
- Plastics are marked with the international abbreviations: (>PE<, >PP<, etc. )
- The cardboard parts consist of recycled paper. They can be put into waste paper containers for recycling.
- Material unsuitable for domestic waste must be disposed of at recycling centres.
- Contact a relevant recycling centre to obtain information about disposal of different materials.

## **PACKAGING AND THE ENVIRONMENT**

- Packaging materials protect your machine from damage that may occur during transportation. The packaging materials are environmentally friendly as they are recyclable. The use of recycled material reduces raw material consumption and therefore decreases waste production.

## CE Declaration of Conformity

We declare that our products meet the applicable European Directives, Decisions and Regulations and the requirements listed in the standards referenced.

## Disposal of your old machine

The symbol on the product or on its packaging indicates that this product may not be treated as household waste. Instead, it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product. For more detailed information about recycling of this product,

please contact your local city office, your household waste disposal service or the shop where the product was purchased.

## 2. INSTALLATION

### 2.1. Machine positioning

When positioning the machine, place it in an area where dishes can be easily loaded and unloaded. Do not put the machine in an area where the ambient temperature falls below 0°C.

Read all warnings located on the packaging before removing the packaging and positioning the machine.

Place the machine close to a water tap and drain. Take into consideration that the connections will not be altered once the machine is in position.

Do not hold the machine by its door or panel.

Leave an adequate distance around the machine to allow ease of movement when cleaning.

 Ensure the water inlet and outlet hoses are not squeezed or trapped and that the machine does not stand on the electrical cable while positioning.

Adjust the feet so the machine is level and balanced. The machine should be placed on flat ground otherwise it will be unstable and the door of the machine will not close properly.

### 2.2. Water connection

We recommend fitting a filter to your water inlet supply in order to prevent damage to your machine due to contamination (sand, rust, etc.) from indoor plumbing. This will also help prevent yellowing and deposit formation after washing.

### 2.3. Water inlet hose

 **WARNING:** Use the new water inlet hose supplied with your machine, do not use an old machine's hose.

 **WARNING:** Run water through the new hose before connecting.

 **WARNING:** Connect the hose directly to the water inlet tap. The pressure supplied by the tap should be a minimum of 0.03 MPa and a maximum of 1 MPa. If the pressure exceeds 1 MPa, a pressure relief valve must be fitted between the connection.

 **WARNING:** After the connections are made, turn the tap on fully and check for water leaks. Always turn off the water inlet tap after a wash program has finished.

 An Aquastop water spout is available with some models. Do not damage it or allow it to become kinked or twisted.

### 2.4. Drain Hose

Connect the water drain hose directly to water drain hole or to the sink outlet spigot. This connection should be minimum 50 cm and maximum 110 cm from floor plane.

 **IMPORTANT:** Items will not wash properly if a drain hose longer than 4 m is used.

## 2.5. Electrical connection

 **WARNING:** Your machine is set to operate at 220-240 V. If the mains voltage supply to your machine is 110 V, connect a transformer of 110/220 V and 3000 W between the electrical connection.

  **The earthed plug of the machine must be connected to an earthed outlet supplied by suitable voltage and current.**

  **In the absence of earthing installation, an authorised electrician should carry out an earthing installation. In the case of use without earthing installed, we will not be responsible for any loss of use that may occur.**

 **The indoor fuse current value should be 10-16 A.**

3. TECHNICAL SPECIFICATIONS

3.1. General appearance

- 1. Upper basket with racks
- 2. Upper spray arm
- 3. Lower basket
- 4. Lower spray arm
- 5. Filters
- 6. Rating plate
- 7. Control panel
- 8. Detergent and rinse-aid dispenser
- 9 . Upper basket track latch
- 10. Upper Cutlery Basket
- 11. Turbo Drying Unit: This system provides better drying performance for your dishes.

3.2. Technical specifications

|                               |   |
|-------------------------------|---|

| Water supply pressure         | Maximum:<br>1 (Mpa)<br>Minimum:<br>0.03 (Mpa) |

## 4. BEFORE USING THE APPLIANCE

### 4.1. Detergent usage

Only use detergents specifically designed for domestic dishwashers.

Add the recommended amount of detergent for the selected programme to ensure the best performance.

Keep your detergents in cool, dry places out of reach of children.

See the detergent manufacturer's instructions for a further information.

### 4.2. Filling the detergent

Push the latch to open the dispenser and pour in the detergent.

Close the lid and press it until it locks in place. The dispenser should be refilled just before the start of each programme. If the dishes are heavily soiled, place additional detergent in the pre-wash detergent chamber.

### 4.3. Using combined detergents

These products should be used according to the manufacturer's instructions.

Never put combined detergents into the interior section or the cutlery basket.

Combined detergents contain not only the detergent but also rinse-aid replacement substances and additional components depending on the combination.

We recommend you do not use combined detergents in short programmes.

Please use powder detergents in such programmes.

If you encounter problems when using combined detergents, please contact the detergent manufacturer.

When you stop using combined detergents, make sure that rinse aid settings are set to correct level.

### 4.4. Rinse-aid usage

Rinse-aid makes dishes sparkle and helps them to dry without spotting. Rinse-aid is required for stain-free utensils and clear glasses. Use only rinse-aid for domestic dishwashers.

### 4.5. Filling the rinse-aid and setting

To fill the rinse aid compartment, open the rinse-aid compartment cap. Fill the compartment with rinse aid to the MAX level and then close the cap. Be careful not to overflow the rinse aid compartment and wipe up any spills.

In order to change the rinse aid level, follow the below steps before turning on the machine:

- Push the programme button and hold it down.
- Turn on the machine.
- Hold down the programme button until “rA” disappears from the display. Rinse aid set follows water hardness set.
- The machine will display the current setting.
- Set the level by pushing the programme (+) and delay (-) buttons.
- Switch off the machine to save the setting.

The factory setting is “4”.

If the dishes are not drying properly or are spotted, increase the level. If blue stains form on your dishes, decrease the level

| Level | Brightener Dose         | Indicator                   |
|-------|-------------------------|-----------------------------|
| 1     | Rinse-aid not dispensed | r1 is shown on the display. |
| 2     | 1 dose is dispensed     | r2 is shown on the display. |
| 3     | 2 doses are dispensed   | r3 is shown on the display. |
| 4     | 3 doses are dispensed   | r4 is shown on the display. |
| 5     | 4 doses are dispensed   | r5 is shown on the display. |

## 5. LOADING YOUR DISHWASHER

For best results, follow these loading guidelines.

We recommend that you place large items (pots, pans, lids, plates and bowls) which are heavily soiled in the lower basket.

The upper basket is designed for delicate and lighter dishware such as glasses, coffee and tea cups and saucers. Position the dishes so that they will not get moved by the spray of water.

Cutlery should be placed in the cutlery basket. Items should be loaded individually into the appropriate slots with their handles downwards. Long utensils should be placed horizontally on the baskets.

 **WARNING:** Take care not to obstruct the rotation of spray arms.

### 5.1. Recommendations

Remove any coarse residue on dishes before placing the dishes in the machine. Start the machine with full load.

 Do not overload the drawers or place dishes in the wrong basket.

 **WARNING:** Always place sharp utensils with the sharp point down and open utensils with their openings down.

## Upper Basket

The upper basket includes a mechanism which enables the height of the basket to be adjusted up (1) or down (2) without having to remove the basket. Hold the basket on both sides and pull it up or push it down, ensuring both sides of the upper basket are in the same position.

### Height Adjustable Rack (peg type)

The height adjustable racks enable glasses and cups to be placed on or under the racks. The racks can be adjusted to 2 different heights. Cutlery and utensils can also be placed on the racks horizontally.

### Height Adjustable Rack (peg type)

The foldable racks in the upper basket enable the placement of large items such as pots and pans. Each section can be folded separately. The foldable racks can be either raised up or folded down.

## Four Folding Racks

(15 pc)

The folding racks allow easier placement of larger items, such as pots and pans. Each section can be folded separately. The racks can be raised up, or folded down, as shown in the images.

### Upper Cutlery Basket

The upper cutlery basket is designed for the placement of large and small cutlery and utensils.

The basket is easily removed from the dishwasher, therefore allows ease of use when removing your items, along with the

basket, after washing.

The upper cutlery basket is composed of two pieces that can be separately removed. Remove the left or right section of the cutlery basket in order to obtain more space for items in the upper basket.

**WARNING:** Knives and other sharp objects must be placed horizontally in the cutlery basket.

**5.2. Alternative Basket Loads**  
**Lower Basket**

**Top basket**

**Incorrect loads**

## 6. PROGRAMME TABLE

| Programme      | Duration (min) | Description   |
|----------------|----------------|---|
| Mini 14'       | 14             | Fast programme intended for recently used dishes which are lightly soiled. Suitable for 4 place settings. |
| Quick 30'      | 30             | Quick wash programme for lightly soiled dishes.   |
| *Eco           | 155            | Standard programme for dishes which are used daily but are not heavily soiled.                            |
| Dual Pro Wash  | 113            | For both lightly soiled delicate glassware and heavily soiled crockery at the same time.                  |
| Super 50'      | 50             | A faster programme for dishes which are used daily but are not heavily soiled.                            |
| Hygiene        | 123            | For heavily soiled dishes which require hygienic washing.   |
| Auto Delicate  | 64-92          | Automatic programme for delicate dishes which are not heavily soiled.                                     |
| Auto Intensive | 111-179        | Automatic programme for heavily soiled dishes.  |

**NOTE:** PROGRAMME DURATION MAY CHANGE ACCORDING TO THE AMOUNT OF DISHES, TAP WATER, AMBIENT TEMPERATURE AND SELECTED ADDITIONAL FUNCTIONS.

- Only use powder detergent in short programmes.
- Short programmes do not include a drying step.
- To assist drying, we recommend partially opening the door after the programme has finished.

\*Eco is the program recommended to wash a normally soiled load at rated capacity.

## 7. THE CONTROL PANEL

1. On/Off button
2. Start/Standby button
3. Half Load button
4. Programme button
5. Tablet Detergent button
6. Extra button
7. Delay button
8. Extra Drying button
9. Programme Display
10. Half Load symbol
11. Tablet Detergent symbol
12. Rinse Aid Lack Warning symbol
13. Program Status Display
  - a- Washing Phase symbol
  - b- Rinse Phase symbol
  - c- Drying Phase symbol
  - d- End symbol
14. Remaining Time/Delay Time/Programme Time Display
15. Delay symbol
16. Extra Fast symbol
17. Extra Drying symbol
18. Silent Wash symbol

### Starting the Machine and Selecting a Programme

Press the Power On/Off button (1), the display (9) will show the most recently selected programme.

Select the programme most suitable for your dishes using the Programme button (4).

Additional functions (3, 5, 6, 7, 8).

**NOTE:** Press the Half Load button (3) to select the area of the dishwasher containing dishes to be washed. You can select both baskets, the upper basket only, or the lower basket only. Press the button until the symbol corresponding to the basket containing the dishes to be washed illuminates. Dishes placed in other areas will not be washed.

**NOTE:** Press the Tablet Detergent button (5) when using a combined detergent that contains rinse aid or other extras. The Tablet Detergent Symbol (11) will remain on as long as it is selected.

**NOTE:** Press the Extra Drying button (8) to add extra drying steps to a programme in order to obtain drier dishes. The Extra Drying Indicator (17) will illuminate.

**NOTE:** Press the Delay button (7) before a programme starts to adjust the delayed programme start time. The Delay symbol (15) will illuminate.

**NOTE:** Press the Extra Fast/Silent button (6) once to activate the Extra Fast function. The Extra Fast symbol (16) will illuminate and the duration of the selected programme will decrease, providing more economical water usage. Pressing the button twice will activate the Extra Silent function. The Extra Silent symbol (18) will illuminate, providing a more sensitive and silent washing operation.

Press the Start/Standby button (2) to start the selected programme.

The display (14) will show the symbols

corresponding to the status of the programme in operation. While the Drying symbol is displayed, the machine will remain silent for 45 to 50 minutes. The Remaining Time Display shows the programme durations and the time remaining of the programme in operation.

**NOTE:** A programme may take a different amount of time to complete than initially stated on the display. This is dependent on the ambient temperature, the temperature of the mains water, and the amount of dishes in the dishwasher.

**NOTE:** Simultaneously press the Half Load (3) and Tablet Detergent (5) buttons for 3 seconds to activate/deactivate the Child Lock. When it is first activated, "CL" will show on the Remaining Time display for 2 seconds. When it is deactivated, "CL" will flash twice.

**NOTE:** When there is insufficient rinse aid, the Rinse Aid Lack Warning symbol (12) will illuminate to indicate the rinse aid chamber needs filling.

## 7. THE CONTROL PANEL

### 7.1. Changing a Programme

Follow the steps below to change a programme while in operation.

- Press the Start/Standby button (2).
- Select a new programme using the Programme button (4).
- Press the Start/Standby button to start the selected programme.
- The new programme will resume the course of the old programme.

### 7.2. Cancelling a Programme

Follow the steps below to cancel a programme while in operation.

- Press and hold the Start/Standby button (2) for 3 seconds.

- The display will count down from 3 to 1. When it finishes, the time remaining for cancellation will show on the display.

The water discharge process will start when the remaining time finishes and the End symbol will illuminate.

### 7.3. Switching Off the Machine

When the End symbol illuminates, switch off your machine using the On/Off button. Disconnect the plug and turn off the water tap.

**NOTE:** Do not open the door before the End symbol illuminates.

**NOTE:** Leave the door of your machine slightly open at the end of a wash programme to speed up drying.

**NOTE:** If the door of your machine is opened or the power is cut during operation, the programme will continue when the door is closed or the power returns.

## 8. CLEANING AND MAINTENANCE

**Cleaning your Dishwasher is important to maintain the machine's service life.**

**Oil and lime may build up in your Dishwasher over time. If this occurs:**

- Fill the detergent compartment but do not load any dishes. Select a programme which runs at high temperature and run the Dishwasher empty. If this does not clean your Dishwasher sufficiently, use a cleaning agent designed for use with dishwashers.
- **Wipe the door seals regularly with a damp cloth to remove any accumulated residue.**

### 8.1. Cleaning machine and filters

Clean the filters and spray arms at least once a week. If any food waste remains on the coarse and fine filters, remove them and clean them thoroughly with water.

- a) Micro Filter      b) Coarse Filter**  
**c) Metal Filter**

To remove and clean the filter combination, turn it counter clockwise and remove it by lifting it upwards **(1)**. Pull the coarse filter out of the micro filter **(2)**. Then pull and remove the metal filter **(3)**. Rinse the filter with lots of water until it is free of residue. Reassemble

the filters. Replace the filter insert, and rotate it clockwise **(4)**.

- Never use your Dishwasher without a filter.
- Incorrect fitting of the filter will reduce the washing effectiveness.
- Clean filters are necessary for proper running of the machine.

### 8.2. Spray arms

Make sure that the spray holes are not clogged and that no food waste is stuck to the spray arms. If there is any clogging, remove the spray arms and clean them under water. To remove the upper spray arm undo the nut holding it in position by turning it clockwise and pulling it downwards. Make sure that the nut is properly tightened when refitting the upper spray arm.

## 9. TROUBLESHOOTING

| FAULT   | POSSIBLE CAUSE   | TROUBLESHOOTING  |
|---|--|--|
| The programme does not start.                                 | Your Dishwasher is not plugged in.                                     | Plug your Dishwasher in.   |
|   | Your Dishwasher is not switched on.                                    | Switch your Dishwasher on by pressing the On/Off button.                             |
|   | Fuse blown.  | Check your indoor fuses.   |
|   | Water inlet tap is closed.   | Turn on the water inlet tap.   |
|   | Your Dishwasher door is open.  | Close the Dishwasher door.   |
|   | Water inlet hose and machine filters are clogged.                      | Check the water inlet hose and machine filters and make sure they are not clogged.   |
| Water remains inside the machine.                             | Water drain hose is clogged or twisted.                                | Check the drain hose, then either clean or untwist it.                               |
|   | The filters are clogged.   | Clean the filters.   |
|   | The programme is not finished yet.                                     | Wait until the programme is finished.  |
| Machine stops during washing.                                 | Power failure.   | Check mains power.   |
|   | Water inlet failure.   | Check water tap.   |
| Shaking and hitting noises are heard during a wash operation. | The spray arm is hitting the dishes in the lower basket.               | Move or remove items blocking the spray arm.   |
| Partial food wastes remain on the dishes.                     | Dishes placed incorrectly, sprayed water not reaching affected dishes. | Do not overload baskets.   |
|   | Dishes leaning each another.   | Place dishes as instructed in the section on loading your dishwasher.                |
|   | Not enough detergent used.   | Use the correct amount of detergent, as instructed in the programme table.           |
|   | Wrong wash programme selected.   | Use the information in the programme table to select the most appropriate programme. |
|   | Spray arms clogged with food waste.                                    | Clean the holes in the spray arms with thin objects.                                 |
|   | Filters or water drain pump clogged or filter misplaced.               | Check the drain hose and filters are correctly fitted.                               |

| FAULT   | POSSIBLE CAUSE  | TROUBLESHOOTING  |
|---|---|--|
| Whitish stains remains on dishes.               | Not enough detergent used.                                  | Use the correct amount of detergent, as instructed in the programme table. |
|   | Rinse aid dosage and/or water softener setting set too low. | Increase rinse aid and/or water softener level.                            |
|   | High water hardness level.                                  | Increase water softener level.   |
| Dishes do not dry.                              | Drying option is not selected.                              | Select a programme with a drying option.                                   |
|   | Rinse aid dosage set too low.                               | Increase rinse aid dosage setting.   |
| Rust stains form on the dishes.                 | Stainless-steel quality of the dishes is insufficient.      | Use only dishwasher-proof sets.  |
|   | A poor mains grounding.                                     | Consult a qualified electrician immediately.                               |
| Detergent remains in the detergent compartment. | Detergent was added when the detergent compartment was wet. | Make sure detergent compartment is dry before use.                         |

## AUTOMATIC FAULT WARNINGS AND WHAT TO DO

| TROUBLE CODE | POSSIBLE FAULT               | WHAT TO DO   |
|--------------|------------------------------|--|
| F5           | Insufficient water           | Make sure the water inlet tap is open and water is flowing             |
|              |                              | Separate the inlet hose from the tap and clean the filter of the hose. |
|              |                              | Contact for service if the error continues.                            |
| F3           | Continuous water input       | Close the tap and contact for service.                                 |
| F2           | Inability to discharge water | Water discharge hose and filters may be clogged.                       |
|              |                              | Cancel the program.  |
|              |                              | If the error continues, contact for service.                           |
| F8           | Heater error                 | Contact for service.   |
| F1           | Overflow                     | Unplug the machine and close the tap.                                  |
|              |                              | Contact for service.   |
| FE           | Faulty electronic card       | Contact for service.   |
| F7           | Overheating                  | Contact for service.   |
| F9           | Divisor position error       | Contact for service.   |
| F6           | Faulty heater sensor         | Contact for service.   |

## 10. PRACTICAL INFORMATION

- When the machine isn't in operation:
  - Disconnect the plug and close the tap.
  - Leave the door slightly open to prevent odour formation.
- Select the dry option to remove water droplets.
- Place dishes in the machine properly to achieve the best energy consumption, washing and drying performance. Please see the programme and consumption table for more information.
- Rinse dirty dishes before placing them in the dishwasher.
- Do not place the machine near a refrigerator because it will reach high temperatures.
- If the machine is located in an area that is at risk of freezing, close the tap, disconnect the inlet hose from the tap and drain the water inside the hose and the machine completely.

# MANUFACTURER GUARANTEE

This warranty is provided in Australia by Glen Dimplex Australia Pty Limited ABN 69 118 275 460 **(Phone number 1300 556 816)** and in New Zealand by Glen Dimplex New Zealand Limited NZBN 9429000069823 **(Phone number 09 274 8265)** in respect of the **Glen Dimplex** product.

## 1. Glen Dimplex Express Warranty

Subject to the exclusions below, we warrant that the product will not have any electrical or mechanical breakdowns within:

- a) In the case of **Glen Dimplex** products used for personal, domestic or household purposes, a period of **2 years (AU) / 2 years (NZ)** from the date the product is purchased as a brand-new product from a retailer located in Australia / New Zealand.
- b) In the case of **Glen Dimplex** products used for purposes other than personal, domestic or household purposes (including business or commercial use), a period of 90 days from the date the product is purchased as a brand-new product from a retailer located in Australia / New Zealand. **Glen Dimplex** products are designed and intended for domestic use only; and
- c) All warranty repairs must be carried out by Glen Dimplex or their nominated service agent

**Note: warranty periods detailed above may vary in line with agreements with select retail and builder partners and may differ between Australia and New Zealand.**

The benefits conferred by this express warranty are in addition to the Consumer Guarantees referred to in section 3 and any other statutory rights you may have under the Australian / New Zealand Consumer Law and/or other applicable laws.

## 2. Warranty exclusions

This express warranty does not apply where:

- a) The product has been installed, used or operated otherwise than in accordance with the product manual or other similar documentation provided to you with the product;
- b) The product requires repairs due to damage resulting from accident, misuse, incorrect installation, insect or vermin infestation, improper liquid spillage, cleaning or maintenance, unauthorised modification, use on an incorrect voltage, power surges and dips, voltage supply problems, tampering or unauthorised repairs by any persons, use of defective or incompatible accessories or exposure to abnormally corrosive conditions, events independent of human control which occurred after the goods left the control of Glen Dimplex;

- c) The repair relates to the replacement of consumable parts such as fuses and bulbs or any other parts of the product which require routine replacement;
- d) You are unable to provide us with reasonable proof of purchase for the product;
- e) the breakdown occurs after the expiry of the express warranty period set out in section 1 or
- f) the product was not purchased in Australia / New Zealand as a brand-new product.

### **3. Consumer guarantees**

Our goods come with guarantees that cannot be excluded under the Australian / New Zealand Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

### **4. How to make a claim**

You may make a claim under this warranty through our website, contacting our customer care line or via email. Contact details for Glen Dimplex Australia and New Zealand can be found at the end of this document

To make a valid claim under this warranty, you must:

- a) Lodge the claim with us as soon as possible and no later than 14 days after you first become aware of the breakdown;
- b) Provide us with the product serial number;
- c) Provide us with reasonable proof of purchase for the product. This can take the form of a store receipt, new home handover form or other payment receipt documentation; and
- d) If required by us, provide us (or any person nominated by us) with access to the premises at which the product is located at times nominated by us (so that we can inspect the product).

## 5. Warranty claims

If you make a valid claim under this warranty and none of the exclusions set out in section 2 apply, we will, at our election, either repair the product or replace the product with a product of identical specification (or where the product is superseded or no longer in stock, with a product of as close a specification as possible).

Goods presented for repair may be replaced by refurbished goods of the same type rather than being repaired. Refurbished parts may be used to repair the goods.

Products are designed and supplied for normal domestic use. We will not be liable to you under this warranty for business loss or damage of any kind whatsoever.

## **READ THE INSTRUCTION BOOKLET BEFORE INSTALLING AND USING THE APPLIANCE.**

The manufacturer will not be responsible for any damage to property or to persons caused by incorrect installation or improper use of the appliance.

The manufacturer is not responsible for any inaccuracies, due to printing or transcription errors, contained in this manual. In addition, the appearance of the figures reported is also purely indicative.

The manufacturer reserves the right to make changes to its products when considered necessary and useful, without affecting the essential safety and operating characteristics.

Glen Dimplex constantly seeks ways to improve the specifications and designs of their products. Whilst every effort is made to produce up to date literature, this document should not be regarded as an infallible guide. Actual product only should be used to derive cut out sizes.

All appliances must be installed by a qualified person/s with adherence to the relevant electrical, plumbing and building codes, with compliance being issued as required by state or national legislation.

Additionally, all upright cookers must have the anti-tilt device installed correctly in adherence to the relevant standards by a licenced installer.

For maximum effectiveness and efficiency all rangehoods should be installed with the use of ductwork, by a licenced installer with adherence to the relevant state and national building codes and regulations.

All Glen Dimplex appliances are for Domestic use only, and must be installed by a licence installer into Domestic Applications only, without exception and to the required Authorities guidelines. Any installation outside of this will VOID warranty. Alfresco areas are not a Domestic application.
